Cost effective for multiple business sites.

For businesses that have large Wide Area Networks, a centralized Internet Gateway is a cost effective, easy way for a company to share Internet charges across multiple sites.

Customisable for your business security needs.

This solution is also highly customizable for a business's security requirements as the gateway can be configured as a firewall. The solution also comes with in built redundancy. Should we experience an issue with our primary Internet Gateway we will automatically fail over to a secondary Internet path.

Service Level Agreement with rebates.

Direct IP also comes with a Service Level Agreement that provides financial rebates should we not meet our promises. We believe so much in our products and services; we're prepared to put our money where our mouth is.
